## INTRODUCTION

The collaborative economy has experienced rapid growth and development in Europe in the past years. It offers new opportunities leading to more choice and lower prices for consumers and allows citizens and entrepreneurs to offer services either on an occasional basis or professionally, contributing to growth and jobs in Europe. The rapid development of the collaborative economy in Europe has also raised questions, inter alia as regards consumer and employee rights and the application of existing legislation.

In its Communication on “A European Agenda for Collaborative Economy”, issued in June 2016, the European Commission announced that it would continuously review developments in the European collaborative economy.<sup>1</sup> This second Eurobarometer survey on the collaborative economy is part of this review. It seeks to shed light on citizens’ perceptions, attitudes and practices in relation to collaborative platforms<sup>2</sup> and the services offered via those platforms, and follows a first Eurobarometer survey on collaborative platforms that was conducted in March 2016<sup>3</sup>.

More particularly, this Flash Eurobarometer survey covers the following issues:

- European Union citizens’ awareness and frequency of use of collaborative platforms, their assessment of the advantages and disadvantages of using such platforms, and the impact of these platforms on their behaviour with respect to the purchasing of services;
- European Union citizens’ use of collaborative platforms to provide services in EU countries, including the frequency with which providers offer services via these channels, their reasons for doing so, and the reasons why some service providers do not use these channels.

This survey was carried out by TNS Political & Social network in the 28 Member States of the European Union between the 23<sup>rd</sup> and the 30<sup>th</sup> April 2018. Some 26,544 respondents from different social and demographic groups were interviewed via telephone (landline and mobile phone) in their mother tongue on behalf of the European Commission, Directorate-General for Internal Market, Industry, Entrepreneurship and SMEs. The methodology used is that of Eurobarometer surveys as carried out by the Directorate-General for Communication (“Media monitoring, media analysis and Eurobarometer” Unit)<sup>4</sup>.

The more detailed analysis of the results is presented in the full version of the report.

*We wish to thank the people throughout the European Union*

*who have given their time to take part in this survey.*

*Without their active participation, this study would not have been possible.*

<sup>1</sup> COM(2016) 356 final. For more information: [http://ec.europa.eu/growth/single-market/services/collaborative-economy\\_en](http://ec.europa.eu/growth/single-market/services/collaborative-economy_en). According to this Communication, collaborative economy involves three categories of actors: services providers, users of services and intermediaries that connect – via an online platform – providers and users and that facilitate transactions between them (‘collaborative platforms’).

<sup>2</sup> Collaborative platforms are specialist internet-based websites or apps that provide an open marketplace where consumers can connect with people offering services. Collaborative platforms are at the centre of the collaborative economy as they enable transactions between people providing and people using a service. They are used for a wide range of services ranging from renting accommodation and car sharing to small household jobs.

## KEY FINDINGS

### **Nearly a quarter of Europeans have used services offered via collaborative platforms, mostly in the accommodation and transport sectors**

- Just under a quarter (23%) of respondents have used services offered via collaborative platforms, but very few use such services on a regular basis i.e. at least once per month (4%).
- Among those who have used collaborative platforms to access services, over half have accessed services in the accommodation (57%) and transport (51%) sectors, but few have accessed professional services (9%) or collaborative finance (8%).
- Among those who have used services offered via collaborative platforms, nearly nine in ten (88%) would recommend those services.
- A majority of users mention *convenient access to services* (73%), *availability of user ratings and reviews* (60%), the fact that *services are cheaper or free* (59%), and the *wider choice of services* (56%) as advantages of using collaborative platforms compared to traditional channels.
- Just under half (49%) see *lack of clarity about who is responsible in the event of a problem* as the biggest disadvantage. More than one third also mention misleading ratings and reviews from other users (38%), misuse of personal data (37%) and less trust in the providers of services (34%). The least mentioned disadvantages are the fact that services offered are not as expected (24%) and problems with online booking process or payments (22%).
- For six in ten (60%) of the users of services offered via collaborative platforms, the use of these services did not impact the extent to which they continued using services offered via traditional channels. On the other hand, around one third (32%) of the users of collaborative platforms, say that the use of services via collaborative platforms has replaced the use of services via traditional channels to at least some extent.

### **Very few Europeans have offered services via collaborative platforms and almost one fifth of Europeans who have not yet provided services via collaborative platforms would consider doing so**

- Only 6% of Europeans have offered services via collaborative platforms.
- When asked to identify the reasons for offering services via collaborative platforms, just over half of providers say that these platforms offer an *easy way to interact with consumers* (53%) and a *more sustainable and efficient use of available assets* (51%), while half say that they *give access to more consumers* (50%) and represent an *additional source of income* (50%).
- Conversely, when asked to identify the main problems they had encountered when providing services via a collaborative platform, nearly half *spontaneously* say that they *had not encountered any problems* (46%). The problem most frequently mentioned is the lack of clarity about how to provide the service legally (22%), followed by difficulties with customers using the services and complicated systems for paying tax (both 19%).
- Just under a fifth (19%) of those who have not provided services via collaborative platforms would consider doing so.

## I. USE OF SERVICES OFFERED VIA COLLABORATIVE PLATFORMS

### Nearly a quarter of Europeans have used services offered via collaborative platforms

Just under a quarter (23%) of respondents say that they have used services offered via collaborative platforms<sup>5</sup>. Around one in ten have used such services *once or a few times* (9%) or *occasionally* (i.e. once every few months) (10%), and 4% use such platforms *regularly* (i.e. once a month or more often).

**D8** Have you ever used a service offered via a collaborative platform?  
(% - EU)

Base: all respondents (n= 26,544)

Although the question and the answer options were worded differently, the results of the survey indicate that the proportion of those who say they have used a service offered via a collaborative platform has increased since the previous Eurobarometer survey in 2016.

In all 28 Member States, only a minority of respondents have used services offered via a collaborative platform. However, there is significant variation between countries. More than a third of respondents have done so in Latvia (40%), Malta (35%) and Ireland (34%). At the other end of the scale, in nine countries, less than a fifth of the respondents have used services offered via collaborative platforms, with the lowest proportions of users observed in Bulgaria and Portugal (both 17%).

<sup>5</sup> D8. Have you ever used a service offered via a collaborative platform? ONE ANSWER ONLY No, never; Yes, once or a few times; Yes, occasionally (i.e. once every few months); Yes, regularly (i.e. once a month or more often); Don't know.

## Services in the accommodation and transport sectors are those that are most frequently used via collaborative platforms

Among respondents who have used services offered via collaborative platforms, over half have done so in the *accommodation* (57%) and *transport* (51%) sectors<sup>6</sup>.

**Q2** In which of the following sectors have you used a service offered via a collaborative platform?  
(MULTIPLE ANSWERS POSSIBLE)  
(% - EU)

Base: respondents who have used services offered via collaborative platforms (n= 6,389)

In 15 of the 28 Member States, the largest proportion of those who have used services offered via collaborative platforms have done so in the *accommodation sector*, while in 12 countries, the largest proportion have accessed services in the *transport sector*<sup>7</sup>.

<sup>6</sup> Q2. In which of the following sectors have you used a service offered via a collaborative platform? MULTIPLE ANSWERS POSSIBLE  
Transport (e.g. car sharing); Accommodation (e.g. renting an apartment); Food-related services (e.g. home delivery, food sharing); Household services (e.g. gardening, repairs, child care); Professional services (e.g. IT services, accounting); Collaborative finance (e.g. peer-to-peer lending or crowd-funding); Other; Don't know.

<sup>7</sup> Results for Cyprus (n=93) and Luxembourg (n=110) should be treated with caution due to low sample sizes.

## Almost nine in ten of those who have used services offered via collaborative platforms would recommend them to others

Among those who have used services offered via collaborative platforms, nearly nine in ten (88%) would recommend those services<sup>8</sup>. Just over a third (35%) say *they would definitely recommend these services*, while just over half (53%) *would recommend them to some extent*. Less than one in ten (7%) *would not recommend them*.

At least eight in ten collaborative platform users in all countries say they would recommend services offered via collaborative platforms<sup>9</sup>. The only exception is the Netherlands, where less than three quarters (73%) say they would do so.

**Q6** Overall, would you recommend services offered via collaborative platforms or not? (%)

Base: respondents who have used services offered via collaborative platforms (n= 6,389)

<sup>8</sup> Q6. Overall, would you recommend services offered via collaborative platforms or not? ONE ANSWER ONLY Yes, definitely; Yes, to some extent; No, not really; No, definitely not; You would recommend some types of services, but not all; Don't know.

<sup>9</sup> Results for Cyprus (n=93) and Luxembourg (n=110) should be treated with caution due to low sample sizes.

**Almost three quarters of the users of services offered via collaborative platforms mention as an advantage of these platforms the fact that they offer a more convenient access to services compared with traditional channels**

Nearly three quarters (73%) of those who have used services offered via a collaborative platform say that a *more convenient access to services* is an advantage of such platforms compared with traditional channels<sup>10</sup>. Smaller majorities of respondents mention as advantages the *availability of ratings and reviews by users* (60%), the fact that *services are cheaper or free* (59%), or that there is a *wider choice of services which are unavailable via traditional channels* (56%).

**Q4** In your personal experience, what are the advantages of using collaborative platforms compared with traditional channels, if any? (MULTIPLE ANSWERS POSSIBLE)  
(% - EU)

Base: respondents who have used services offered via collaborative platforms (n= 6,389)

<sup>10</sup> Q4. In your personal experience, what are the advantages of using collaborative platforms compared with traditional channels, if any? MULTIPLE ANSWERS POSSIBLE Cheaper or free services offered via collaborative platforms; A wider choice of services unavailable via traditional channels; A more convenient access to services; The availability of ratings and reviews by users; The opportunities they offer to interact with interesting people; Possibility of exchanging services instead of paying for them; Other; None, there are no advantages; Don't know.

## Lack of clarity about who is responsible in the event of a problem is the disadvantage of collaborative platforms most frequently mentioned by users

The majority of those who have used collaborative platforms identify at least one disadvantage, with only 15% spontaneously saying that there are no significant issues<sup>11</sup>. The most frequently mentioned disadvantage is the *lack of clarity about who is responsible in the event of a problem* (49%), followed by *misleading ratings and reviews* (38%), *misuse of personal data* (37%), and *less trust in the providers of services offered via collaborative platforms* (34%).

**Q5** In your personal experience, what are the disadvantages of using collaborative platforms compared with traditional channels, if any? (MULTIPLE ANSWERS POSSIBLE)  
(% - EU)

Base: respondents who have used services offered via collaborative platforms (n= 6,389)

<sup>11</sup> Q5. In your personal experience, what are the disadvantages of using collaborative platforms compared with traditional channels, if any? MULTIPLE ANSWERS POSSIBLE Problems with the online booking process or payments; Less trust in the providers of services offered via collaborative platforms; Services offered via collaborative platforms are not as expected; Misleading ratings and reviews from users; Lack of clarity about who is responsible in the event of a problem; Misuse of your personal data; Other; None, there are no significant issues; Don't know.

### The most common reasons for not using collaborative platforms are not knowing what they are, or preference for traditional channels

The most frequently mentioned reasons for not using collaborative platforms are *not knowing what such platforms are* (36%) and *preference for services offered via traditional channels* (34%)<sup>12</sup>. A further fifth of respondents mention concerns about sharing personal data on the platform or the Internet (20%), followed by lack of trust in the services offered by collaborative platforms (17%) and lack of technical knowledge about how to use collaborative platforms (14%).

**Q1** For which of the following reasons have you never used a service offered via a collaborative platform?  
(MULTIPLE ANSWERS POSSIBLE)  
(% - EU)

Base: respondents who have never used services offered via collaborative platforms (n= 20,034)

<sup>12</sup> Q1. For which of the following reasons have you never used a service offered via a collaborative platform? MULTIPLE ANSWERS POSSIBLE  
You don't know what collaborative platforms are; Poor Internet access; Lack of technical knowledge about how to use collaborative platforms; Lack of trust in the services offered via collaborative platforms; Preference for services offered via traditional channels (e.g. with direct personal contact); Concerns about sharing personal data on the platform or the Internet; Other; Don't know.

**Six in ten of the users of services offered via collaborative platforms use these services on top of their habitual usage of services offered via traditional channels or as newcomers to the market**

A third (33%) of the users of services offered via collaborative platforms say *they use services offered via traditional channels to approximately the same extent, but they now also use these same services via collaborative platforms*<sup>13</sup>. Just over a quarter (27%) *have only started to use these services when they became available via collaborative platforms*. On the other hand, one fifth of those using services offered via collaborative platforms (20%) *have to some extent replaced the services they used via traditional channels*, while just over one in ten (12%) *have completely replaced some types of services*.

In summary, 60% of users of services via collaborative platforms use them on top of their habitual usage of services offered via traditional channels or as newcomers to the market, while around one third (32%) have replaced services used via traditional channels with those offered via collaborative platforms to at least some extent.

**Q3** Thinking about your overall experience with services offered via collaborative platforms in the last 12 months, which of the following statements best describes your experience?  
(% - EU)

Base: respondents who have used services offered via collaborative platforms (n= 6,389)

<sup>13</sup> Q3. Thinking about your overall experience with services offered via collaborative platforms in the last 12 months, which of the following statements best describes your experience? ONE ANSWER ONLY You have to some extent replaced the services you used via traditional channels with services offered via collaborative platforms; You have completely replaced some types of services you used via traditional channels with services offered via collaborative platforms; You use services offered via traditional channels to approximately the same extent, but you now also use these same services via collaborative platforms; You only started using the services when they became available via collaborative platforms; None; Don't know.

## II. PROVISION OF SERVICES VIA COLLABORATIVE PLATFORMS

### Only 6% of Europeans have ever offered services via collaborative platforms

Only 6% of Europeans have ever offered services via collaborative platforms, with 3% offering them *once or a few times*, 2% offering them *occasionally* (i.e. once every few months), and only 1% offering them on a *regular basis* (i.e. once a month or more often)<sup>14</sup>. Over nine in ten (94%) have *never offered services via collaborative platforms*.

**D9** Have you ever offered a service via a collaborative platform?  
(% - EU)

Base: all respondents (n= 26,544)

In all but two countries, less than one in ten have offered a service via a collaborative platform. The exceptions are Latvia (17%) and France (11%).

<sup>14</sup> Q10. In which of the following sectors have you provided a service via a collaborative platform? MULTIPLE ANSWERS POSSIBLE Transport (e.g. car sharing); Accommodation (e.g. renting an apartment); Food-related services (e.g. home delivery, food sharing); Household services (e.g. gardening, repairs, child care); Professional services (e.g. IT services, accounting); Collaborative finance (e.g. peer-to-peer lending or crowd-funding); Other; None; Don't know.

## The services most commonly offered via collaborative platforms are in the transport and accommodation sectors

The *transport sector* (44%) is the sector most frequently mentioned by those who have offered services via collaborative platforms, followed by the *accommodation sector* (35%).

**Q10** In which of the following sectors have you provided a service via a collaborative platform?  
(MULTIPLE ANSWERS POSSIBLE)  
(% - EU)

Base: respondents who have offered services via collaborative platforms (n= 1,598)

### Providers have a variety of reasons for offering services via collaborative platforms

Just over half say that these platforms offer *an easy way to interact with consumers* (53%) and a *more sustainable and efficient use of available assets* (51%), while half say that they *give access to more consumers* (50%) and *represent an additional source of income* (50%)<sup>15</sup>.

**Q11** For which of the following reasons do you offer services via collaborative platforms? (MULTIPLE ANSWERS POSSIBLE)  
(% - EU)

Base: respondents who have offered services via collaborative platforms (n= 1,598)

<sup>15</sup> Q12. What are the main problems you encountered when providing services via a collaborative platform, if any? MULTIPLE ANSWERS POSSIBLE Lack of clarity about how to provide the service legally; Complicated or difficult to provide the service legally; Complicated system for paying tax; Unclear impact on your employment status; Difficulties with consumers using your services; Other; None; Don't know.

## Nearly half of the respondents that are providers of services via collaborative platforms have encountered no problems when using these platforms

When asked to identify the main problems they had encountered when providing services via a collaborative platform, nearly half spontaneously say that they had not encountered *any problems* (46%). The problem most frequently mentioned is the *lack of clarity about how to provide the service legally* (22%), followed by *difficulties with customers using the services* and *complicated systems for paying tax* (both 19%).

**Q12** What are the main problems you encountered when providing services via a collaborative platform, if any?  
(MULTIPLE ANSWERS POSSIBLE)  
(% - EU)

Base: respondents who have offered services via collaborative platforms (n= 1,598)

### A majority of those who do not offer services via collaborative platforms do not have the time nor the interest to do so

When asked why they have never offered a service via a collaborative platform, nearly two thirds (64%) say that *they do not have sufficient time or interest* to do this<sup>16</sup>. Just under a third (31%) say *they lack the technical knowledge about how to use collaborative platforms*, while around a quarter mention *lack of trust in online booking process or payments* (25%) and *lack of trust in consumers using their services* (24%).

**Q8** For which of the following reasons have you never offered a service via a collaborative platform?  
(MULTIPLE ANSWERS POSSIBLE)  
(% - EU)

Base: respondents who have never offered services via collaborative platforms (n= 24,857)

<sup>16</sup> Q8. For which of the following reasons have you never offered a service via a collaborative platform? MULTIPLE ANSWERS POSSIBLE No time or interest; Poor Internet access; Lack of technical knowledge about how to use collaborative platforms; Lack of trust in the online booking process or payments; Lack of trust in consumers using your services; Unclear or complicated to provide the service legally; Complicated system for paying tax; Unclear impact on your employment status; Other; Don't know.

### Nearly a fifth of respondents who have never offered services via collaborative platforms would consider doing so occasionally

Just under a fifth (19%) of those who have not previously offered services via collaborative platforms say that they would consider doing this occasionally, compared with nearly eight in ten (78%) who say that they would not<sup>17</sup>.

In all countries, the majority of respondents that have never offered services via collaborative platforms would not consider doing so occasionally in the future, with the proportion varying from just under two thirds in Cyprus, Greece (both 65%) and Portugal (64%), to over eight in ten respondents in the Netherlands (86%), Belgium and Germany (both 84%).

**Q7** Would you consider offering services occasionally as a private individual via collaborative platforms? (%)

Base: respondents who have never offered services via collaborative platforms (n= 24,857)

<sup>17</sup> Q7. Would you consider offering services occasionally as a private individual via collaborative platforms? ONE ANSWER POSSIBLE Yes; No; Don't know.

**More than one in ten of those who have never offered services via collaborative platforms (14%), occasionally offer services, as a private individual, via traditional channels**

Over eight in ten (85%) of those who have not provided services via collaborative platforms have also *not offered services via traditional channels*<sup>18</sup>. However, 14% respondents do so, either *once or a few times* (6%), or *occasionally* (i.e. once every few months) (6%), or *regularly* (i.e. once a month or more often) (2%).

**Q9** Have you ever offered services occasionally as a private individual via traditional channels?  
(% - EU)

Base: respondents who have never offered services via collaborative platforms (n= 24,857)

In all but one of the 28 Member States, less than a quarter of those who have never offered services via collaborative platforms say also that they **have never offered services via traditional channels** either.

<sup>18</sup> Q9. Have you ever offered services occasionally as a private individual via traditional channels? ONE ANSWER ONLY No, never; Yes, once or a few times; Yes, occasionally; Yes, regularly; Don't know.

### III. USER-PROVIDER PROFILING OF RESPONDENTS

#### Three quarters of Europeans are neither users nor providers of services via collaborative platforms, while almost one fifth are only users

By far the most common profile of respondents is that they are *neither users nor providers* of services via collaborative platforms, with three quarters (75%) of those polled falling into this category. Nearly a fifth (19%) are only *users of these services*, while only 1% of respondents are *solely providers*, leaving 5% who are *users and providers*.

**D8D9** User-provider profile  
(% - EU)

Base: all respondents (n= 26,544)

In all countries, the largest percentage of respondents are **neither users nor providers of services via collaborative platforms** and, in most cases, this proportion ranges from two thirds to eight in ten of the respondents. The proportion of respondents who are **only users of services offered via collaborative platforms** ranges from just over one in ten of respondents in Belgium, Italy (both 14%) and Bulgaria (13%), to over three in ten in Malta (31%). In all but two countries, less than one in ten are **both users and providers of services offered via collaborative platforms**. The exceptions are Latvia (15%) and France (10%). Finally, very few respondents (2% or less) in any of the countries surveyed are **only providers** of these services, and in each country this is the lowest percentage recorded.

## TECHNICAL SPECIFICATIONS

Between the 23 and 30 April 2018, TNS Political & Social, a consortium created between TNS political & social, TNS UK and Kantar Belgium, carried out the FLASH EUROBAROMETER 467 survey on request of the EUROPEAN COMMISSION, Directorate-General for Internal Market, Industry, Entrepreneurship and SMEs. It is a general public survey co-ordinated by the Directorate-General for Communication, "Media monitoring, media analysis and Eurobarometer" Unit.

The FLASH EUROBAROMETER 467 survey covers the population of the respective nationalities of the European Union Member States, resident in each of the 28 Member States and aged 15 years and over.

All interviews were carried using the TNS e-Call centre (our centralised CATI system). In every country the respondents were called both on fixed lines and mobile phones. The basic sample design applied in all states is multi-stage random (probability). In each household, the respondent was drawn at random following the "last birthday rule".

TNS has developed its own RDD sample generation capabilities based on using contact telephone numbers from responders to random probability or random location face-to-face surveys, such as Eurobarometer, as seed numbers. The approach works because the seed number identifies a working block of telephone numbers and reduces the volume of numbers generated that will be ineffective. The seed numbers are stratified by NUTS2 region and urbanisation to approximate a geographically representative sample. From each seed number the required sample of numbers are generated by randomly replacing the last two digits. The sample is then screened against business databases in order to exclude as many of these numbers as possible before going into field. This approach is consistent across all countries.

Readers are reminded that survey results are estimations, the accuracy of which, everything being equal, rests upon the sample size and upon the observed percentage. With samples of about 1,000 interviews, the real percentages vary within the following confidence limits:

Statistical Margins due to the sampling process  
(at the 95% level of confidence)

*various sample sizes are in rows*

*various observed results are in columns*
